

INTRODUCTION JULY 1, 2026 PROTECTING THE ENVIRONMENT AND BRINGING THERMOPLASTIC MANUFACTURING TO THE NEXT LEVEL!

ReNeuvo Composites Ontario Introduction

RENEUVO COMPOSITES ONTARIO: It utilizes a proprietary formulation of 100% recycled post-Consumer plastic pellets and recycled tire reprocessed rubber crumb to produce a new environmentally responsible thermoplastic products that are themselves recyclable. The first Production Module will be commissioned in Cambridge Waterloo Region, Ontario Canada producing approximately 453,592 Kgs. 100 million lbs. of XyloX product annually, generating approximately 200 million US dollars sales a year. ReNeuvo group of companies will employ approximately 1,200 to 1,500 full time personnel. It is expected to start production on fourth quarter of 2027 (Q4 2027). Two additional production modules will be commissioned as demand for the product increases. In the meantime, XyloX product will be produced by two strategic partners. The group of companies' head office will be set up in Cambridge, Ontario Canada. (Please visit the Website www.ReNeuvoCompositesOntario.com)

Strategic Partners: ReNeuvo Composites Ontario and Associated Companies and its strategic partners stand out as an open, inclusive inter-company collaboration. Many different opinions are expressed and shared in the best interest of those that we provide our services to, not just those of ReNeuvo. Cisco Canada and Bell Canada. Since the XyloX products manufacturing plant will take time to build, in the meantime we have two strategic partners manufacturing under contract. Ingenia Polymers Corp. (<https://www.ingeniapolymers.com>) and CCC Plastic (<https://www.ccc-group.com>) and others under review.

Distributors Marketing Strategy: Taking into consideration the automotive, packaging industry as our main market, we already started communications with various distributors and select companies for the consumption of our product. This search goes from contacts that we currently have plus searches of associations, data bases, industry social media outlets and any other source that have the needed information to generate the initial approach.

Montachem International: We are in the process of signing a Distributor Agreement with Montachem International, please visit website. www.montachem.com.

Ravago Americas: As soon as Ravago finalized XyloX samples lab tests, we will sign up with the biggest thermoplastic distributor in the world. See below about them. www.ravagoamericas.com.

Other Countries Potential Distributors: At the present we have identified and are in communication with potential distributors in the Europe, Central Latinoamerica, South America, India, Australia and other countries.
